The proposed display, expert mode

Long 50-strike straddle bought at 25% vol: P&L if unwound (black) at each quarter of its life, by prevailing implied-vol regime σ_I.
Bands: where the share is likely to be given that regime, with realised vol $\sigma_R = \sigma_I$ (lognormal; $\rho = -0.60$, $\nu = 0.85$ from Apple, 2021 to 2026).
